

## PRE-ANESTHETIC BLOOD TESTING CONSENT FORM

Like you, our greatest concern is the well-being of your pet. Before putting your pet under general anesthesia, we will perform a full physical examination. However, many conditions, including disorders of the liver, kidneys, or blood, are not detected unless blood testing is performed. Such tests are especially important before any kind of surgery.

For those reasons, we highly recommend blood screening before such procedures. The total cost of these important tests is: \$\_\_\_\_\_.

Our laboratory is fully equipped and staffed to perform these important blood tests. Results will be immediately available to examine prior to anesthesia and/or surgery. Please indicate your choice below:

Pet's name: \_\_\_\_\_

YES, I want my pet to have a pre-anesthesia blood screen

NO, I do not want to have a pre-anesthesia blood screen

Owner's signature: \_\_\_\_\_

Date: \_\_\_\_\_
